

Interpreting Histograms WS

The histogram below show the number of texts students sent each day.

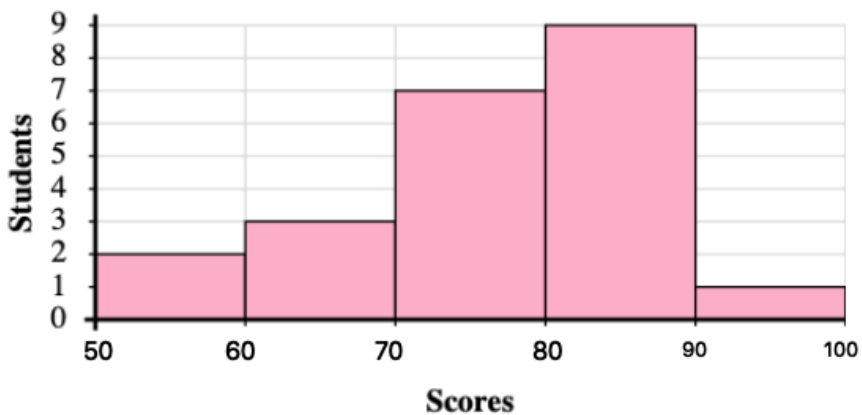

1) How many students are represented in this histogram?

2) How many students sent 6 or more texts?

3) Suppose the two measures of center are 6 texts and 6.8 texts. Which is the mean and which is the median? Explain your answer.

The histogram below show the students scores for a quiz.

4) How many students are represented in this histogram?

5) How many students sent between 50 and 69.9 on the quiz?

6) Suppose the two measures of center are a score of 78.5 and a score of 79.5. Which is the mean and which is the median? Explain your answer.
