

Solving Two-Step Linear Equations WS#1

Solve each equation. Show your work. For your final answer, your variable should be on the left side.

1) $38 = -10 - 3r$

2) $-4 - 4x = -32$

3) $4 = -3n + 4$

4) $-54 = 9 - 9x$

5) $-6x + 1 = -35$

6) $-15 = 3 + 6x$

7) $9 + 2p = -1$

8) $-84 = -4 - 8n$

$$9) 10 - x = -7$$

$$10) 70 = 4x + 10$$

$$11) 5v - 2 = 83$$

$$12) 1 - 8x = 121$$

$$13) -14 = 4x - 6$$

$$14) -2a - 3 = -15$$

$$15) 5a - 7 = 38$$

$$16) 9x - 10 = 125$$
